Profile

Junior Backend Developer with hands-on experience building secure RESTful APIs using Java and Spring Boot. Experienced with Spring Security, JWT Authentication, JPA/Hibernate, MySQL, Docker, and unit testing using JUnit and Mockito. Seeking an Internship or Junior Backend Developer opportunity.

Projects

Store Management System • [GitHub](#)

Built a Store Management System using Spring Boot, Spring Security (JWT), JPA, and MySQL, supporting inventory management and order processing.

Implemented secure REST APIs, pagination, validation, exception handling, transactional operations, logging, and unit testing using JUnit 5 and Mockito.

Tech Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, Docker, Maven, Git, GitHub, Postman.

Skills

Backend: Java, Spring Boot, Spring Security, REST APIs, Spring Data JPA, Hibernate, JWT Authentication

Database: MySQL, PostgreSQL

Tools: Git, GitHub, Docker, Postman, Maven

Programming language: Java, SQL, Python

Education

B.Sc. in Artificial Intelligence, Beni-suef

September 2023 - Present

Languages

Arabic - Native

English - Conversational
